

» Generation 3D – we are building our future in our team.

As a technology trendsetter in 3D metal printing, we are growing worldwide and are expanding our team in Lichtenfels. Send your application as soon as possible for a

student (m/f) internship or a bachelor or master's dissertation in the field of research and development

In the middle of your university course or nearly finished?

Now is just the right time to gather information about a potential employer where you can make a significant contribution with your knowledge and skills. Concept Laser GmbH will offer you plenty of opportunities for this:

Complete an internship with us or impress us with the subject of your bachelor's or master's dissertation.

Are you inquisitive and creative?

Do you like working on a team with other people?

Wide-ranging insights into the fascinating world of 3D metal printing await you. Our team is continuously pushing the boundaries of the unique LaserCUSING® process and shaping the innovations of the future.

You can learn more about Concept Laser on our website. Mrs. Nicole Kuss would be pleased to answer any questions you might have about this job opportunity.

We look forward to your application.

Concept Laser is one of the world's leading manufacturers of industrial laser systems for the Additive Manufacturing (AM) of parts using metal powder.

In our "Concept Academy" we concentrate on the education and training of academic specialists in the field of AM within our own company. Concept Laser offers students the perfect platform to bring theory and practice together.
